

Congratulations for selecting the most advanced vehicle "VOD" (video on demand system) multiuser system with dual Full HD 1080P LCD touch screen displays. System can support multiple users accessing the same movies at the same time with full stop, pause, forward or back functions, just like systems found in airplanes.

To access your "VOD" System please go to main screen and select the triangular "APP" icon.

Then click on "VOD Server" icon.

Server Password is "123456789"

All your media /video files will be displayed on your screen.

Click and select the video you want to play. System will load the file and start playing.

To display the video controls (stop , pause, back ,forward) just tap anywhere on touch screen display.

Select the function desired within 5 seconds before all video controls fade away.
